

## MSc Project Management

An industry-led programme aimed at developing your professional competencies

## The University of Manchester

### Master of Science in Project Management (Online)

#### Programme Overview

Our MSc Project Management is an industry inspired programme that uses a Practice Based Learning approach to project management development. The programme is delivered through a fully distance-learning approach. The PMDL differs from other courses in that, rather than simply acquiring new knowledge and ideas, delegates are expected to adopt a reflective practice approach so that their learning can inform and be informed by their practises of managing projects in the workplace. The programme acts as a Community of Practice for delegates to network and communicate with their peers so that they can share experiences and practices across a wide array of organisations and project environments.

**Degree awarded** Master of Science

**Duration** 3 years  
Online Distance Learning (Part-time)
